Subject: Support for the Rubicon Trail Cleanup and Abatement Order

I am writing to express my concern for the draft Cleanup and Abatement Order issued on January 23, 2009 by the Central Valley Regional Water Quality Control Board to the El Dorado County Department of Transportation. I am concerned there won't be honest discussions concerning public use. I do believe sanitation and water drainage needs to be addressed, and I believe working with all parties will come good balance of use. involvement with all parties will bring ownership. Thanks in Advance.
